

HORSE FEED REFERENCE GUIDE

PROD #	NAME	PROTEIN	FAT	NSC	FORM	DESCRIPTION
600094	Equus Fiber Max Omega	12.0%	10.0%	14.0%	Textured	High calorie, high-fat, high fiber, grain free, beet pulp-based feed that is easily digested in the foregut of the horse. Specifically formulated to meet the nutritional demands of the performance athlete. KER nutritionists utilize appropriate levels of KER micronutrient ingredients designed to deliver the optimal amount and proper balance of critical vitamins and minerals to each horse. A low NSC value (14%) makes Fiber Max Omega suitable for horses with Cushing's, and/or metabolic challenged horses.
600090	Equus Race 12%	12.0%	8.0%	33.0%	Textured	Specifically formulated and nutritionally balanced for race and performance horses. Highly palatable Equus Race provides the equine athlete with a variety of energy sources selected to maintain a physical as well as a mental edge through a rigorous training and performing campaign. Beet pulp, a highly digestible fiber provides a unique source of energy, while vegetable oil is widely accepted as a compliment to the high-performance diet. Fully fortified with KER micronutrients.
600001	Equus Foal and Weanling Diet	15.0%	3.0%	40.0%	Textured	Textured feed featuring precise levels of lysine, calcium, phosphorous, copper, zinc, and other trace minerals to aid in the proper development of muscle and sound structure in the young, rapidly growing horse.
600002	Equus Broodmare and Yearling Diet	12.5%	4.0%	40.0%	Textured	Highly palatable textured feed with added fat designed to promote proper development of the growing horse over 12 months of age. Ideal for gestating mares to provide optimal development of the foal in utero, and lactating mares to maximize milk production. High quality rolled and whole grains wrapped in molasses make Equus Broodmare and Yearling an extremely digestible source of proteins, calories, vitamins, and chelated minerals.
600088	Equus Senior Wet-Golden Years Diet	14.0%	2.5%	20.0%	Textured	Nutritionally designed to meet the older horses' changing nutrient needs. Equus Senior Wet provides optimum levels of soluble fibers and oils and provides a significant boost in calories over conventional sweet feeds. Equus Senior Wet supplies high levels of bioavailable microminerals, Diamond V yeast, a natural source of vitamin E and bioavailable selenium. Equus Senior Wet is unique in its highly concentrated fortification and can be fed at a minimum four pounds feeding rate to meet nutritional requirements.
600005	Equus Senior Dry-Golden Years Diet	14.0%	2.5%	18.0%	Pellet	Senior feed that can be fed to horses that have low tolerance for molasses. Formulated with added vitamins and biotin to meet the needs of an older horse. Every bag contains chelated minerals for better bioavailability.
600006	Equus Equibalance Pellets	27.0%	2.5%	10.8%	Pellet	Highly digestible source of protein, vitamins, and minerals. This ration balancer mini-pellet is formulated to provide required levels of micronutrients at a low intake. Equibalance is fortified with KER micronutrients to include natural-source vitamin E, chelated trace minerals, B vitamins, biotin, yeast culture, and organic selenium. Perfect for ponies, easy keepers, laminitis, HYPP or metabolic challenged horses.
600007	Equus Pro-Pellet	13.5%	5.9%	34.0%	Pellet	Ideal for 'one feed programs' when it is necessary to meet the needs of multiple life stages. Pro-Pellet is fortified with KER micronutrients to include chelated minerals, natural vitamin E and B vitamins with Diamond V yeast.

11.21

High quality ingredients | Chelated minerals, organic selenium, and all-natural Vitamin E | Produced at a facility free from medication
 Developed in partnership with world-renowned Kentucky Equine Research (KER) | Dr. Steve Jackson, Consulting Equine Nutritionist
